

***The Hillsboro Club
Hillsboro Beach, Florida***

Client: Mr. Dan Dodge
The Hillsboro Club
901 Hillsboro Mile
Hillsboro Beach, FL 33062

Construction Cost
\$500,000.00

The proposed project is located on Hillsboro Inlet, Hillsboro Beach, Broward County.

The proposed project is the construction of a concrete, marginal dock along the existing seawall to provide transient dockage for members of the club.

The Chappell Group conducted daily water quality sampling at the Hillsboro Club within the Hillsboro Inlet to meet the conditions of permit issuance for the proposed dock. Included in the daily water quality sampling was 24 hour diel sampling as well as the collection of water samples to be analyzed for specific biological factors. In addition, the Chappell Group, Inc. was responsible for preparing the report of findings based on collected field parameters and analytical results. The Chappell Group, Inc. performed these tasks for the client as required by Broward County Environmental Protection and Growth Management Department from April 2009 through May 2009.
