Construction Cost: \$30,000,000.00

The Pompano Beach Resort project consists of the excavation of an artificial basin from uplands for a proposed marina and construction of a marginal dock along the Pompano Canal.

The Chappell Group, Inc. was responsible for all environmental services related to the design and permitting of the proposed marina. Environmental services provided to the developer included a full benthic resource survey and upland site assessment, along with the design and permitting of the proposed marina. Environmental Permits were applied for with the South Florida Water Management District, U.S. Army Corps of Engineers, Florida Department of Environmental Protection, and Broward County Environmental Protection and Growth Management Department.
